

# 2023

## COLLECTION

SUSTAINABLE HEADWEAR LOOKBOOK

**Atlantis**  
headwear evolution

The logo features a stylized, dark blue infinity symbol or a continuous loop above the brand name. The word "Atlantis" is in a bold, dark blue sans-serif font, and "headwear evolution" is in a smaller, lighter blue sans-serif font below it.

**Atlantis** is an **italian brand**  
specialized in designing  
and manufacturing  
**high-quality headwear**  
since 1995

# 2023 CONCEPT

## The headwear (R)evolution

To be consistent with our sustainability journey we decided to change our overall approach for the 2023 Collection: **turn our bestsellers into hats and beanies made from recycled or organic sources.**

**We worked hard on this conversion to ensure the same quality, look and feel of our headwear** while making them suitable for their new purpose, trying to raise awareness in the supply chain towards a more conscious choice.

**Headwear as we have always done, but in a more responsible way.**

# HEADWEAR EVOLUTION

**2018**

The beginning of our path: first Oeko-Tex® models, eco-friendly dyeing and traceability passport

**2019**

First preferred materials like recycled polyester and organic cotton in Atlantis Collection

# 2020

First Sustainability Report  
to spread our social and  
environmental impacts

# 2022

New Code of Ethics and first  
Collection made only from  
recycled or organic materials

# 2021

Code of Conduct and more  
products with preferred  
materials like Polyana® fiber

# 2023

Working on our headwear (r)  
evolution: transition from  
conventional fabrics of our  
bestsellers to preferred  
materials with less impact

# 2025

Since 1995, we have devoted passion and care to the design of our products. Over the years, this dedication has turned into something more: a need to avoid the dangerous effects of climate change and a commitment to an increasingly responsible business that respects the planet and people. We believe that sustainability starts with a mindset, it is a natural evolution that we have to make and it goes far beyond the product, embracing everything we do.

By 2025 we set another challenge in our journey: to produce only items that include elements with reduced environmental impact in 100% of our Atlantis Collection. To achieve this goal, we are working not only on new products, but also on the progressive conversion of all conventional items into products with preferred materials and in compliance with our Atlantis Sustainable Products Principles, while remaining faithful in design and quality.

Headwear as we have always done, but in a more responsible way.

**The revolution is on our minds. Wear it on your head.**

# OUR RESPONSIBILITY

- We care about **quality** and **sustainability**.
- We are serious about our **sustainable mission** and want to prove that we are **transparent** and **trustworthy**.
- We want our hats to be on people's heads **for as long as possible** since high-quality headwear has a longer life cycle.

**With different certifications we want to give the consumers reassurance that the products they buy have been accredited by a third party.**

That means that **our products are made responsibly** and we work together with factories to adhere to strict environmental and social standards.

# BRING THE REVOLUTION ON YOUR HEAD

**Sustainability starts with a mindset.** Collection after collection we **are working to convert each product** with conventional fabrics and features to preferred alternatives **with organic and recycled material.**

Look for the green leaf and S to identify the products designed with a sustainable mindset to help you buy better and wear longer.

## NEW COLLECTION

Our best sellers, same look with a new sustainable soul for our revolutionary products.

## SUSTAINABLE CHOICE

Wear what you believe.  
Follow the green leaf to spread our commitment.

# FEATURES

## **Not only fabrics.**

From this collection we are going further,  
converting every traditional component  
into a recycled alternative:

**Recycled buckram**

**Recycled closures**

**Recycled sweatband**

**Recycled taping**

**Recycled lamination**

# TECHNOLOGIES

## The revolution doesn't stop.

Thanks to our continuous R&D we do our best to make the traditional treatments more human and eco-friendly, maintaining the high quality and performance of our fabrics.

**WR-PFC free** it's our water-resistant treatment that **keeps our caps dry without environmentally harmful components.** The finishing gives the fabric **water-resistant characteristics, without the use of PFCs** (perfluorocarbons) **compounds**, which are not biodegradable and harm the environment, human and animal health.

## **Aqua-® is a branded solution dyed recycled polyester yarn made by ReTraze®.**

Unlike traditional wet processes where yarns are produced and then dyed, with dope dyeing the pigments are trapped inside the recycled plastic after it cools to a solid form, becoming part of the new, stronger yarn and saving more energy, water and emissions during the process.

**The ReTraze Aqua-® source of plastic bottles is collected entirely within 20km from the seashore**, and they continue to work on expanding the collection area and tracking system.

In contact with the skin, the **Dry-tech 100% recycled polyester** band is **completely breathable, absorbs** sweat and allows for **quick drying.**

**The UPF50+ treatment** remains for the moment traditional but we are working on exploring and studying new alternatives.

# STICKERS & HANGTAGS

**Although the packaging and accessories are beautiful and necessary,** with the new collection we decided to make some changes and **reduce all excess as much as possible to achieve a more essential and ecological approach.**

We have worked to reduce weight, quantity and new materials on what we cannot eliminate completely. **Our aim is to be consistent with our path and limit our impact** as much as possible, while continuing to investigate new alternatives and solutions.

# OUR ACHIEVEMENTS

**NUMBER OF  
STICKERS AND  
HANGTAGS  
REDUCED**

**NEW RECYCLED  
POLYBAGS**

**NEW STICKERS  
IN FSC CERTIFIED  
PAPER**

**RESULT:  
MORE THAN 55% OF  
THE NEW COLLECTION  
PACKAGING WEIGHT  
REDUCED**

# RECYCLED NYLON

**Nylon is a super-performing fiber:** particularly resistant, stretchable and lightweight, it allows us to produce comfy and strong headwear. However, it has a high environmental cost: it belongs to a family of polymers called polyamides and, like polyester, nylon is made from a non-renewable resource (crude oil) in an energy and chemically-intensive process which, however, has the benefit of creating super-performing fabrics.

Our strategy includes the conversion of conventional materials into preferred ones with a better environmental and social outcome.

**Recycled nylon is our reply to the need of performance, but with less impact.** It is made from pre-consumer waste from industrial processes, **including material scraps that would otherwise have been downgraded or sent to a landfill.** Switching to recycled nylon is our way of being less dependent on virgin oil, reducing greenhouse gas emissions and, of course, waste material.

# WHY CHOOSE RECYCLED NYLON

**REDUCES  
DEPENDENCE  
ON FOSSIL RAW  
MATERIALS**

**REDUCES  
CO2 EMISSIONS  
COMPARED TO VIRGIN  
NYLON DURING  
THE PRODUCTION  
PROCESS**

**REDUCES WASTE  
MATERIAL**

**LESS AIR, WATER  
AND SOIL POLLUTION  
COMPARED TO  
NON-RECYCLED  
NYLON**

## FEATURES

# RECYCLED POLYESTER

**Polyester is an important fiber in our collections and one of the most widely used in the world: strong, durable and crease-resistant, it allows us to make lightweight headwear that dry quickly.** But its production comes at an environmental cost: it's a synthetic fiber derived from oil with a lower environmental impact than the production of natural fibers in terms of water and land<sup>1</sup> but, the energy required to produce polyester makes it a very high-impact process<sup>2</sup>. This is why **Atlantis wants to encourage the use of recycled polyester instead of virgin fossil-based one.**

Its alter-ego, recycled polyester, or rPET, **is made from polymers obtained by melting used plastic bottles and transforming them into textile fiber.**

Did you know that every minute, nearly 1 million plastic bottles are purchased around the world?<sup>3</sup>

**Even if recycled options allow a reduction of emissions compared to the virgin options, we know that it's not the definitive solution to pollution from synthetic fibers:** rPET's mechanical recycling process significantly reduces the material's quality and unfortunately very few clothes are recycled back into textile use and the majority of wasted polyester garments are still in the landfills. Moreover, rPET is not biodegradable and loses microplastic fibers as much as virgin plastic.

<sup>1</sup> Sustainable Apparel Materials 2015 (<https://matteroftrust.org/wp-content/uploads/2015/10/SustainableApparelMaterials.pdf>)

<sup>2</sup> (Environmental Sciences Europe (2021) Analysis of the polyester clothing value chain to identify key intervention points for sustainability)

<sup>3</sup> The Guardian

## However, there are good reasons for choosing to use this material in our products:

- **Resistance:** when exposed to the sun, the material does not lighten and does not lose quality, unlike cotton; this allows for greater durability and a reduction in waste.
- **Lack of large-scale alternatives:** there are currently no alternatives to mechanically recycled rPET on a large scale.

To remedy the problems relating to the rPET, we will commit to a series of virtuous behaviours along our path of sustainable transition. For example, **we believe it is necessary to carry out continuous monitoring of the chemically recycled polyester market which**, although generally characterized by a greater environmental impact than its mechanically recycled equivalent, can be subjected to a greater number of recycling processes while keeping the quality intact. Furthermore, **we are evaluating collaborations with organizations along the supply chain to guarantee the recycling of the waste generated during production.**

Another option that we consider as an alternative to rPET is the use of other materials, such as recycled nylon or recycled wool.

In conclusion, recycled polyester is still a more environmentally sustainable fiber than virgin polyester.

**The more we recycle, the less garbage winds up in our landfills.**

**We can reduce our reliance on petroleum, save natural resources, production and energy costs and reduce the negative impacts** of the extraction and processing of virgin materials.

Our LCA study<sup>4</sup> conducted on polyester products showed that when we replace virgin polyester with recycled polyester we reduce the CO2 emissions of 4% and if we replace acrylic we have a reduction of almost 70%. Impressive!

Recycling helps us reduce the industry's reliance on fossil fuel sources and manage our resources in a more ethical way: using products to their full potential.

<sup>4</sup> The LCA was conducted on selected articles, taking into account the complete life of the product, from its production to the distribution.

# WHY CHOOSE RECYCLED POLYESTER

**NON-RENEWABLE  
ENERGY SOURCES  
ARE CONSERVED  
(E.G., OIL)**

**REDUCES  
CO2 EMISSIONS  
BY 16% COMPARED  
TO VIRGIN  
POLYESTER<sup>5</sup>**

**REDUCES  
EXTRACTION OF CRUDE  
OIL AND NATURAL  
GASES FROM  
THE EARTH TO MAKE  
MORE PLASTIC**

**IT USES 62%  
LESS ENERGY  
THAN VIRGIN  
POLYESTER<sup>5</sup>**

**REDUCES WASTE  
BY 34% AND  
WATER BY 99%  
COMPARED TO  
CONVENTIONAL ONE<sup>5</sup>**

<sup>5</sup> Comparison calculated on 1kg woven recycled polyester vs virgin polyester from Textile Exchange data.

# ORGANIC COTTON

**Cotton is the world's largest non-food crop.** Grown by more than 80 countries, its production is concentrated in India, China, US, Brazil, and Pakistan which combined together produce 75% of all the world's cotton.<sup>1</sup>

**Cotton is an impressive material** and one of the most used in our collections: it's **soft, comfortable, breathable** and **hypoallergenic**.

Despite its presence in nature, conventional cultivation is often not so sustainable, **which uses chemicals** (synthetic pesticides, herbicides, fertilisers and GMOs) and **large amounts of water for irrigation, irreversibly damaging the soil**. There are also social impacts, **such as child and forced labour and exposure to potentially toxic and carcinogenic compounds**.

The alternative exists and is called **organic cotton** grown without the use of **pesticides and chemical fertilisers** which, in the long run, filter both into plants and into the soil. **Organically farmed cotton comes from controlled and certified crops**, supporting biodiversity and healthier ecosystems. This way, **water consumption is significantly reduced, soil fertility is preserved and better working conditions** and health are guaranteed to farmers and their families.

The LCA study<sup>2</sup> we conducted also confirmed that choosing organic cotton for our products led to a **reduction of CO<sub>2</sub> emission from 18% to 21%** compared to the conventional one.

Organic cotton was one of the **first preferred materials introduced in 2018** and we keep investing in this fabric selecting certified supply chains that include both environmental and ethical standards and allow us to verify the fiber origin.

<sup>1</sup> The World Counts (2021) World Cotton Production Statistics.
